Meera Iyer

Senior Data Engineer

Bengaluru, Karnataka | meera.iyer@example.com | linkedin.com/in/meera-iyer-sample | github.com/meera-iyer-sample

SUMMARY

Data Engineer with 7 years of experience designing batch and streaming pipelines on AWS. Led the migration of a 4 TB on-premise warehouse to Snowflake and mentor a team of four engineers.

EXPERIENCE

Senior Data Engineer, Nimbus Data Labs, Bengaluru (Mar 2022 - Present)

- Designed Spark and Airflow pipelines processing 2 billion events a day with 99.9% on-time delivery.
- Built a Kafka streaming layer that cut reporting delay from 6 hours to under 5 minutes.
- Reduced Snowflake spend by 28% through clustering, query tuning and warehouse right-sizing.
- Introduced data quality checks and Docker-based local testing, halving production incidents.

Data Engineer, Orbit Analytics, Chennai (Jul 2019 - Feb 2022)

- Wrote Python and SQL ETL jobs loading 150+ tables into a central data warehouse.
- Rewrote slow Scala Spark jobs, bringing a nightly run down from 4 hours to 50 minutes.
- Automated infrastructure on AWS with Terraform, covering S3, EMR and Redshift.

SKILLS

Languages: SQL, Python, Scala
Data platforms: Spark, Airflow, Kafka, Snowflake, dbt
Cloud and tooling: AWS, Docker, Kubernetes, Terraform, Git

CERTIFICATIONS

- AWS Certified Data Engineer - Associate, 2024
- SnowPro Core Certification, 2023

EDUCATION

B.Tech Computer Science, Lakeshore University, Chennai (2015 - 2019)
CGPA 8.7 / 10
